Keyboard shortcuts: zones

Keyboard shortcuts: zones

Context

Click the element’s name field. The bar at the bottom of the page displays the shortcuts available for the active level.

Starting point

Step 2 — name field of the relevant level

Prerequisites

- Place the cursor in the corresponding field.

Reference

Shortcut	Action
Ctrl + -	Delete the zone
Ctrl + +	Insert a zone after
Ctrl + Shift + +	Create a new surface
Ctrl + I	Add another name to the zone
Ctrl + Enter	Duplicate the zone
Ctrl + Shift + Enter	Split the zone

Shortcut	Action
Ctrl + Space	Hide or show surfaces
Ctrl + Right	Go to a child surface
Ctrl + Up / Down	Go to the previous / next zone
Ctrl + Shift + Up / Down	Move the zone up / down

Expected result

Commands apply to the active level.

Remember

- Shift is the capital-letter key. Up, Down, Left and Right refer to the arrow keys.
- Shortcuts depend on the active field. The bar in your version is the reference, particularly for Add another name and Split.
