Import a procedure from a plan

Import a procedure from a plan

Context

You can add a procedure from an existing plan to the library.

Starting point

Library → Procedures → Import procedures

Prerequisites

- Have a plan containing the procedure to reuse.

Steps

1. Reuse a procedure from a plan

In the procedures library, click Import procedures. Choose the existing plan and the procedure to reuse. After import, find it in the library and check its product, parameters and tasks.

Expected result

The imported procedure is found and checked in the library.

Remember

- After importing, check the procedure’s product, parameters and tasks before reusing it.
